

List Layout-

List view is a page that displays a list of records from a database table, and includes tools for filtering, sorting, and configuring how the records are displayed.

It is collection of records

Number	Opened	Short description	Caller	Priority	State	Category	Assignment group	Assigned to	Updated	Updated by

We can edit the data by double clicking on it

The screenshot shows the ServiceNow Incidents table. The 'Short description' column for the first row (INC0000024) is highlighted in blue, indicating it is in edit mode. A tooltip above the cell states 'multiple updates' and '4 rows will be updated'. The table contains 12 rows of incident data.

We can edit column value by clicking on shift+down/up arrow → double click → edit

The screenshot shows the same ServiceNow Incidents table. A context menu is open over the 'Short description' column of the first row. The menu options include: Show Matching, Filter Out, Copy URL to Clipboard, Copy sys_id, Assign Tag, Archive Record, Assign to me, Follow on Live Feed, Show Live Feed, and Add to Visual Task Board.

We can filter the records based on the columns value using show matching and filter out

Show matching – will list the records of same values that are in that particular category

The screenshot shows a ServiceNow incident list titled "Dominos Pizza and a happy mood- Incidents". A context menu is open over the "Category" column, with "Filter Out" selected. The menu also includes options like "Show Matching", "Copy URL to Clipboard", "Copy sys_id", "Assign Tag", "Archive Record", "Assign to me", "Follow on Live Feed", "Show Live Feed", and "Add to Visual Task Board".

Filter out – all the records which are related to hardware will be removed

Copy url to clipboard – we can directly open that url separately then that particular record gets opened and we can debug the problem easily

Copy sys_id- a system identifier and 32 digit hash code to easily identify each application

The screenshot shows the same ServiceNow incident list. A context menu is open over the "Priority" column, displaying various actions such as "Sort (a to z)", "Sort (z to a)", "Show Visual Task Board", "Ungroup", "Group By Caller", "Bar Chart", "Pie Chart", "Launch Interactive Analysis", "Launch Process Mining", "Configure", "Import", "Export", "Update Selected", "Update All", "Data Management", "Create Application Files", "Import XML", and "Show XML".

problem.LIST – it opens in new tab and will list all the data related to that particular application

problem.list – closes all tabs to its right and shows the data in the current tab itself

Incident.FORM- will create a new record in the new tab

Incident.form- create a form in the current tab

Problem.CONFIG- opens a new tab and all configurations related to particular table can be seen

Problem.config- opens in same tab and all configurations related to particular table can be seen

Incident.DO- creates in new tab

Incident.do-creates in same tab

The screenshot displays the ServiceNow configuration interface for Business Rules. The top navigation bar includes tabs for Business Rules (61), Client Scripts (17), Dictionary Entries (103), Dictionary Entry Overrides (12), Notifications (9), UI Actions (53), Access Controls (731), UI Policies (18), Data Policies (8), Styles (14), and View Rules. The main content area shows a table of Business Rules with columns: Name, Active, Application, Order, and Updated. A context menu is open over the table, showing options like Sort, Ungroup, Group By Active, Launch Interactive Analysis, Launch Process Mining, Configure, Import, Export, Update Selected, Update All, Data Management, Create Application Files, Import XML, and Show XML. The 'Configure' option is selected, leading to the 'List Layout' configuration screen. This screen has two panes: 'Available' and 'Selected'. The 'Available' pane lists various fields like Abort action, Accessible from, Advanced, Application [+], Class, Client callable, Condition, Created, Delete, Description, Display name, Domain [+], Domain Path, Filter Conditions, and Insert. The 'Selected' pane lists fields already in the layout: Name, Active, Table, Application, Order, Updated, Add message, Created by, and Execute function. Below the panes, there are 'List view' and 'Create new field' sections. The 'List view' section has a 'View name' dropdown set to 'Default view'. The 'Create new field' section has fields for 'Name', 'Type' (String), and 'Field length' (Small (40)).
